PRODUCT DESCRIPTION

Unigloves COMFORT®

The smooth glove

The Comfort® is a **premium disposable glove** made of latex, which is mainly used in the medical and care sector thanks to its pleasantly **smooth surface**. However, it is also suitable for the food and cosmetics industries and for handling chemicals.

Made from **high-quality natural latex**, the disposable glove is certified as a **type B** chemical protection glove in accordance with the European standard **EN ISO 374-1** in addition to the standards **EN ISO 21420** and **EN 455** in

accordance with the PPE Regulation **(EU) 2016/425**.

The durable material is waterproof and offers protection against **viruses, fungi and bacteria**. With a protein content of less than 50 µg/dm², the latex glove is particularly **skin-friendly**. The flexible fit also ensures a high level of comfort and precise tactile sensitivity.

Thanks to the exceptional **double chlorination**, the Comfort® is particularly smooth to use and at the same time offers a **gentle and easy donning**.

The ambidextrous design of the glove allows for quick and frequent changes of use. The Comfort® is available in the color **natural** and in the sizes **XS, S, M, L and XL**.

EIGENSCHAFTEN
