## PRODUCT DESCRIPTION

## UNIGLOVES BEAKERS FOR MOUTH RINSING

The Unigloves, recyclable rinsing beakers made of PP (polypropylene) are currently available in 13 bright colors.

With our beakers you make a good & safe choice for your dental office, because they completely round off the color concept of the units. Mixing up is therefore impossible - because the safety of staff and patients is our first priority. In addition, the Unigloves rinsing beakers are: Made in Europe and recyclable. With short transport routes we save huge amounts of CO2 emissions and with PP (polypropylene) as raw material we have a chemically neutral plastic, which can be recycled very well.
