PRODUCT DESCRIPTION

NITREX 241ND

Our Nitrex 241ND Cut Resistant Gloves feature both our **Unigloves NitreGuard® Technology** and **Unigloves NitreGrip® Technology** for a superior safety glove with high performing protection.

The advanced Unigloves NitreGuard Technology are gloves designed for applications with a high cut risk. The technology affords these gloves a rating of between cut level D and F in a straight blade cut test as standardised by EN388: 2016. Nitrex 241ND gloves achieved equivalent to **level 5 cut resistance (cut level D)** in testing and can resist $\geq 15N$ & Further enhancing the abrasion protection properties of Nitrex 241ND work gloves is our Unigloves NitreGrip® Technology. The sandy nitrile palm coating, which is resistant to oils and grease, acts as a physical barrier for the hands and affords **these gloves maximum abrasion**, tear protection and exceptional grip in dry, wet and oily environments. Reducing the need for a firm grip, these gloves reduce fatigue and ensure material handling capabilities aren't compromised in challenging environments. Meanwhile, Nitrex 241ND's **reinforced thumb crotch** provides added protection against abrasive materials and helps to extend the life of the glove. The elasticated wrist featured on these ultra light weight gloves with grip means a secure fit, helping to keep hands free from dust ingress.

In addition, the Nitrex 241ND is **OEKO-TEX® STANDARD 100** certified to ensure that our gloves are free from harmful substances and protect the health of your employees.

The Nitrex 241ND is available in **grey/black** in sizes **S, M, L, XL** and **XXL**.
