PRODUCT DESCRIPTION

NITREX 241NFX

Nitrex 241NFX, part of our **premium range** of cut resistant work gloves, is built to endure even the **harshest conditions**. Equipped with Unigloves' **NitreGuard® Technology**, these gloves boast **the highest grade of cut protection (cut level F)**, for their superior resistance against sharp and abrasive materials. Unigloves' **NitreGrip® Technology** means these gloves offer a **secure grip in dry, wet, or oily environments**, making them an ideal solution for any high risk tasks your workers face.

Nitrex 241NFX gloves feature a medium weight, seamless polyester liner combined with **HPPE** and **steel**, allowing breathability while ensuring maximum cut protection. They offer **excellent dexterity and flexibility**, effectively reducing hand fatigue during extended use. The sandy nitrile coating resists oils and grease, forming a protective barrier for hands. Meanwhile, **the reinforced extended nitrile thumb crotch offers additional protection** for when your workers are handling abrasive materials, thus enhancing the gloves' durability and delivering ongoing protection, day after day.

The Nitrex 241NFX is available in **white/grey** in sizes **S, M, L, XL** and **XXL**.
