PRODUCT DESCRIPTION

NITREX 245P

Our Nitrex 245P palm coated gloves have been tested to meet **European standard EN388: 2016, cut resistance level D** (formerly cut level level 5), and will withstand **≥15N**. Of course, protection is not the only factor to consider when selecting the ideal safety glove for your workforce. For even the most hazardous of tasks, **comfort** and **performance** are key factors in selecting protective equipment.

Our Nitrex 245P PU safety gloves are constructed with a **13 gauge seamless polyester/nylon blend** combined **with HPPE**, for a comfortable, form-fitting glove that allows the **hand to breathe**, without compromising on performance against cutting hazards. The **flexibility** offered by the PU coated Nitrex 245P cut resistant gloves means high levels of dexterity for handling small parts, as well as **excellent dry and damp grip**. Furthermore, the secure fit of the Nitrex 245P's elasticated wrist affords wearers additional protection and ongoing comfort. These features equate to **reduced hand fatigue, superior protection, and excellent performance** in even the toughest of conditions.

The Nitrex 245P is available in grey in sizes S, M, L, XL and XXL.
