PRODUCT DESCRIPTION

Nitrex 270NF

Our Nitrex 270NF sandy nitrile palm coated gloves are a **fantastic general handling glove**. Designed to withstand even the toughest abrasive materials, all whilst ensuring ongoing **comfort and flexibility**, these durable and form-fitting gloves are an ideal addition to your everyday personal protective equipment regime.

The Nitrex General Handling Gloves range has been designed to provide everyday protection against a range of hazards, all whilst maintaining comfort and performance. Utilising our advanced **NitreGrip® Technology**, Nitrex 270NF abrasion resistant gloves feature a surface treatment that provides an assured grip when working in dry, wet, or oily conditions. Resistant to oils and grease and offering excellent abrasion resistance, these hard-wearing general purpose safety gloves reduce the need for a strong grip, thus reducing hand fatigue and ensuring the protection of both hands and materials.

The light weight and ultra-**comfortable 15 gauge** seamless nylon liner helps reduce fatigue even further and helps ensure an excellent fit and feel in wear. This form-fitting comfort affords additional grip and dexterity, for ease of use in handling small parts, in even the most challenging of conditions - including in wet, greasy, or oily

environments. The sandy nitrile coating is both durable and consistent across the palm of the glove and reduces grease and oil ingress. This means hands are protected against hazardous materials as well as irritation from excess moisture. Resistant to degradation from oils and grease, Nitrex 270NF's sandy nitrile coating makes them an extremely robust glove, suited to a broad variety of applications.

In addition, the Nitrex 270NF is **OEKO-TEX® STANDARD 100** certified to ensure that our gloves are free from harmful substances and protect the health of your employees.

The Nitrex 270NF is available in **blue with a black palm coating** in sizes **XS, S, M, L, XL and XXL**.
