PRODUCT DESCRIPTION

Nitrex 360FCT

Nitrex 360FCT **Thermal Work Gloves** offer thermal protective properties, abrasion and cut resistance, hi viz yellow for enhanced visibility, and superior grip, thanks to our **Unigloves NitreGrip® Technology**. The 360FCT is also suitable for use in food applications.

In addition, the Nitrex 360FCT is **OEKO-TEX® STANDARD 100** certified to ensure that our gloves are free from harmful substances and protect the health of your employees.

Our reusable Nitrex by Unigloves range represents the culmination of decades of experience and years of research and development into new safety glove materials and technologies. One of the latest is the **Unigloves NitreGrip® Technology**, an advanced surface treatment that provides an assured grip when working in dry, wet or oily conditions. The technology reduces the strength needed to grip, thus reducing hand fatigue and protecting hands and materials even over long hours of use.

The flexible **dual nitrile coating** consists of a fully coated, flat nitrile base layer that provides liquid resistance to

the wearer and full 360° hand protection and allows for precise handling of parts and materials; whilst the sandy nitrile palm coating is **resistant to oils and grease** the coating acts as a physical barrier against these potential hazards. In addition, the sandy nitrile finish coating of our Nitrex 360FCT gloves maintains exceptional grip in dry, wet, and oily environments, so no matter the conditions your workers are facing, you can rely on its performance. The 360FCT also provides assured grip when used in **food applications**.

The elasticated knitted wrist of this hard-wearing work glove ensures a secure fit and keeps hands free of dust ingress. Meanwhile, the double lined brushed acrylic thermal liner keeps hands warm and comfortable in cold weather and protects against low temperatures.

The Nitrex 360FCT is available in hi-viz yellow with a black lining in sizes **S, M, L, XL, XXL** and **3XL**.

EIGENSCHAFTEN
