PRODUCT DESCRIPTION

Nitrex 360FCT - the robust one

The Nitrex 360FCT is a particularly **resistant thermal glove** that cannot be harmed by cold, dry, wet and oily conditions. Thanks to the **NitreGrip® technology**, it reliably offers the best grip and provides support for the activity being carried out by reducing the force needed to grip. The **nitrile foam** used is resistant to oils and fats and ensures excellent dexterity. The penetration of liquids is avoided by the **double nitrile coating**. To meet the high requirements of cold environments, the glove is equipped with a specially developed, brushed acrylic thermal lining that both keeps the cold out and offers additional comfort. Possible areas of use range from agriculture to manufacturing and production to the construction sector. The fluorescent **yellow ("hi-viz yellow")** of the Nitrex 360FCT ensures additional safety due to the increased visibility. The elastic knitted cuff prevents dust from penetrating.

The Nitrex 360FCT is available in hi-viz yellow with a black lining in sizes **S, M, L, XL, XXL** and **3XL**.

EIGENSCHAFTEN

COLOUR	<i>black, yellow</i>
GAUGE	<i>15</i>
PRODUCT FEATURES	<i>Cold protection, Double lined brushed acrylic thermal inner, Dual nitrile coating, Excellent dry, wet and oily grip, food-safe</i>
NORM GLOVES	<i>EN388, EN511, CE</i>
PACKAGING CONTENT	<i>1 pair per polybag</i>
SHIPPING UNIT	<i>6 packs per carton</i>
