PRODUCT DESCRIPTION

Nitrex 645

Our Nitrex 645 Chemical Resistant Gloves are a medium weight gauntlet design, affording excellent strength with high levels of both flexibility and dexterity to protect the hands, wrists and lower arms. Their flock-lined construction assists in donning and removal and is comfortable against the skin. This helps to keep hands dry and fresh thanks to the natural moisture-wicking qualities of cotton fibres. Another benefit of the natural cotton flock lining is that it does not irritate the skin.

The ergonomic design of our Nitrex 645 latex work gloves helps to ensure ongoing comfort and dexterity throughout use, whilst the slip-resistant honeycomb pattern of the palm and fingertips ensures excellent grip in both wet and dry conditions.

Resistant to a range of chemicals and cleaning agents, these latex flock lined rubber gloves are suitable for use in a variety of applications. From household rubber gloves that protect hands from daily domestic cleaning agents to more heavy duty industrial cleaning work gloves, our Nitrex 645 Chemical Resistant Gloves are as versatile as they are strong. Furthermore, these latex work gloves are also approved for use with foods, making them ideal for food handling and processing tasks and helping to ensure against contamination of food products

The Nitrex 645 is available in blue in sizes XS, S, M, L and XL.
