XL	645-10

PRODUCT DESCRIPTION

Nitrex 645 - the structured one

The Nitrex 645 is designed for use in production facilities, laboratories, waste management and all areas in which there may be contact with chemicals. Made of **latex and flocked on the inside**, the reusable protective gloves combine flexible wearing comfort with the highest requirements for professional use. The **non-slip honeycomb structure** on the palms guarantees a safe grip. The Nitrex 645 is resistant to a wide range of chemicals and cleaning agents and is certified according to the standards **EN ISO 374-5** and **EN ISO 374-1**. The soft inner lining wicks moisture away and makes it easy to put the gloves on and take them off. The **ergonomic fit** means they can be worn for a long time and reduces tiredness in the hands. The food-safe gloves can also be used in food processing and offer reliable protection against mechanical injuries according to **EN 388**.

The Nitrex 645 is available in **blue** in **sizes XS, S, M, L and XL**.
