for small heads and faces - Facemask for children

PRODUCT DESCRIPTION

Unigloves PROFIL PLUS® Small

Like its larger relative Profil Plus, the **Unigloves Profil Plus Small** face mask has the same properties and can therefore be used in medicine, industry or privately. The face mask has been tested according to **EN 14683 (Type II R)** and has, thanks to the 3-fold glass fibre-free filter medium, a **bacteria filtering capacity** of up to 98%. **Protection** for the **user** as well as the **environment** can thus be guaranteed. This mask is suitable for **small faces** due to the reduced mask size (also suitable as a children's face mask.) The flexible **nose clip** (nickel-free) allows the mask to be optimally adjusted to the nose. **Skin-friendly elastic bands** (latex-free) provide a good fit on the head.
