5 l	50 % PET / 50 % Cellulose	9022

PRODUCT DESCRIPTION

UNIGLOVES MAXI WIPES NON-WOVEN WIPES FOLDED

The low-linting non-woven wipes, Maxi Wipes, are made of 50% polyester and 50% viscose. The structure of the wipes enables effective disinfection and cleaning effects and has a low adsorption behaviour. At the same time, the wipes provide a complete and optimal release of the active ingredient of the disinfectant onto the desired surface.

The rolls are available individually packed with a perforated tear-off of 90 sheets (REF 9022) or 70 sheets (REF 9070), each with a sheet size of 300 x 300 mm.

REF 9022 suitable for 5l disinfection bucket

REF 9070 suitable for 3l disinfection bucket
