PRODUCT DESCRIPTION

Unigloves Stronghold®

The Unigloves Stronghold® is a **premium, food-safe disposable glove** made from latex-free nitrile, designed for professional use in laboratories, hospitals, medical practices, and various industrial environments. Tested in accordance with the **PPE Regulation (EU) 2016/425** and the European standards **EN 374, EN 420, and EN 455**, it meets the highest medical quality requirements with an **AQL of 0.65**, exceeding standards for pinholes. The **chlorinated finish** provides a softer, more comfortable feel, while the powder-free formulation helps prevent hands from drying out.

Textured palms and fingertips offer improved grip, particularly in wet or oily conditions, and **touchscreen compatibility** allows users to operate mobile and tablet displays without removing the gloves. This **heavyweight nitrile examination glove** is exceptionally durable, waterproof, and resistant to chemicals and **chemotherapy drugs**, providing reliable protection against viruses, fungi, and bacteria.

The latex-, thiuram-, and protein-free nitrile makes the glove highly **skin-friendly**. A beaded cuff adds extra strength and helps prevent liquid rollback, while the flexible fit and ambidextrous design allow for easy donning and doffing.

These medical-grade nitrile gloves come in a distinctive purple color and **are washed offline for an ultra-soft**

finish. The Stronghold® is available in sizes XS, S, M, L, and XL – the **reliable choice** for those who demand superior comfort, protection, and performance.

EIGENSCHAFTEN
