PRODUCT DESCRIPTION

UNIGLOVES UNIPROTECT® FLEXI TOUCH WHITE

The Uniprotect Flexi Touch is a food-safe hygienic glove made of TPE and is primarily used in industrial areas. The waterproof thermoplastic elastomer is extremely soft and free from proteins and dithiocarbamates. The Uniprotect Flexi Touch is therefore ideal for sensitive skin. The smooth surface ensures a natural sense of touch. Thanks to its fit and flexibility, the glove is easy to put on and remove. The ambidextrous design makes it convenient to use.

The Uniprotect Flexi Touch is available in white and transparent blue and in sizes S, M, L and XL.
